Reviews

Excellent electronic book and valuable one. We have read and so i am sure that i am going to likely to study again once more in the foreseeable future. I am just happy to inform you that here is the very best book i have read during my personal lifestyle and might be he greatest book for possibly.

VDM Verlag Aug 2011, 2011. Taschenbuch. Book Condition: Neu. 224x154x15 mm. This item is printed on demand - Print on Demand Neuware - The alien encounter has long been a defining and popular subject of science fiction cinema. However, Stanley Kubrick's 2001: A Space Odyssey (1968) and Andrei Tarkovsky's Solaris (1972) are interrogative, ambiguous, complex, and distinct artistic accomplishments that stand apart from and above the conventional science fiction film. 2001 and Solaris not only represent but complicate the alien/human dichotomy; in the end, they destabilize the dichotomy and suggest a radical synthesis of the dichotomous elements. 2001 and Solaris further underscore epistemological and specifically anthropocentric limitations when it comes to understanding the alien or attempting to make sense of the alien encounter. This investigation should be of interest not only to film studies in general but to science fiction scholarship in particular. It aims to provide a sophisticated reading of 2001: A Space Odyssey and Solaris supported by relevant literature in an effort to join in the ongoing scholarly discussion and critical legitimization of science fiction cinema. 180 pp. Englisch.
