By Of Technology Assessment Office of Technology Assessment,  
Of The United States Congress of the United States

University Press of the Pacific, United States, 2005. Paperback. Book Condition: New. 274 x 208 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.As the United States and other nations begin to get serious about an array of potentially significant environmental threats, from global climate change to local groundwater contamination, traditional formulas of environmental management are being reassessed. The remediation or end-of-pipe strategies of the past 20 years are unlikely to provide satisfactory, cost-effective protection of ecosystems and human health in the future. Systematic change is needed. Increasingly, product design is being viewed as a possible catalyst in transforming societal patterns of production and consumption. Product design is an important environmental focal point, because design decisions directly and indirectly determine levels of resource use and the composition of waste streams. By placing a greater emphasis on design, environmental problems can be addressed in a proactive manner. In this report, OTA provides a conceptual overview of how designers might integrate environmental concerns with traditional design objectives, and how policymakers can best take advantage of such opportunities. Although the concept of green design is gathering momentum, a number of technical, behavioral, economic, and informational barriers need to be addressed. By...
