Space and space-time applications to environment

By Giuliano Langella

LAP Lambert Academic Publishing Mrz 2012, 2012.

Taschenbuch. Book Condition: Neu. 220x150x10 mm. This item is printed on demand - Print on Demand Neuware - Digital mapping is a key tool to study, understand and depict environmental parameters. Spatial variability within the landscape is measured at point observation locations, and it is modelled as continua using spatially exhaustive ancillary information. Many technologies are available as sources of usable and low cost ancillary information, such as probe sensing (e.g. proximal geophysics, air borne laser scanning, satellite imagery), and digital terrain analysis (e.g. combining a digital elevation model with the gravitational field). The complete picture of the environmental complexity is gained when point measurements are repeated in time domain to create a point spatiotemporal dataset. Many statistical techniques exist to explore the variation of environmental parameters at measured point locations in the attribute, geographic and/or temporal domains. This dissertation includes two main applications to environment: the digital mapping of some key soil features using spatial statistics (such as geostatistics, fuzzy logic, and artificial neural networks); and the spatiotemporal analysis of daily and spatially sparse rainfall data using ensembles of neural networks. 172 pp. Englisch.

Reviews

This pdf is wonderful. We have go through and so i am certain that i am going to going to study yet again once more in the future. Its been developed in an exceedingly straightforward way which is merely after i finished reading through this pdf where really transformed me, modify the way i think.

-- **Ollie Balistreri**

This type of pdf is every little thing and helped me searching forward and more. It can be writter in easy words and phrases and never hard to understand. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about should you request me).
